

## TECHNICAL SPECIFICATIONS - MOVEABLE FEASTS

We require a secure dressing room 2 hours clear before performance start for set up and dressing.

A reasonably flat and clear floor area to move about in with no obvious obstructions (we cannot use stairs although we can lift up or down before and after performance/table set)

Double door access if we are required to go through doorways.

Parking information and allocation if required.

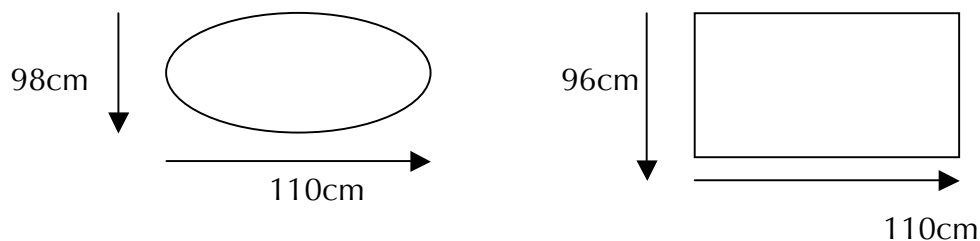

Any loading dock facilities info especially where more than 1 Moveable Feast is performing, as our equipment is bulky.

Moveable Feasts requires no assistance during the performance but a catering person is required to restock and clear items on a regular basis either from a workstation or as Feasts move around the space (1 per each table).

Moveable Feasts is available nationally and internationally. We have created a lightweight system specifically for flight travel and can carry minimum 2 complete tables and costumes for 23kg allowances.

Moveable Feasts warrants that it has public liability insurance and products liability cover of AUD\$10million each.

Moveable Feasts basic dimensions are as follows
